-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 18 February 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 1-12 provide for the use of synchronizing time bases of a first video device and a second video device as set forth in claim 1, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 1-12 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2622

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 6-9, and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishimura et al. (5,303,050).

Regarding claim 1, Nishimura shows a synchronization information-extracting step (34,36), a phase difference determining step (80), a control information-transmitting step (23, 90), and a phase switching step (10).

Regarding claim 2, the steps above are repeated in Nishimura.

Regarding claim 6, see col. 6, lines 4-44.

Regarding claim 7, see col. 8, lines 34-41.

Regarding claim 8, see col. 6, lines 4-8.

Regarding claim 9, see col. 6, lines 9-17.

Regarding claims 13 and 14, Nishimura shows an output port (14), and an input port (13). The first type of control information is met by the frame error signal  $\Delta V$ , and the second type of control information is met by the subcarrier signal (col. 8, lines 37-41).

Regarding claim 15, see rejections as recited above.

6. Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Kawakami et al. (5,990,967).

Regarding claim 16, Kawakami shows an output port (919), and an input port (918). The signal 917 and signal 920 meet the control information and time base limitations as claimed, respectively.

***Allowable Subject Matter***

7. Claim 17 is allowed.
8. The following is a statement of reasons for the indication of allowable subject matter: Prior art does not teach or suggest the input port, the reference input, the decompression engine, means for determining a frequency error, and an output port as recited in claim 17.
9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Lee whose telephone number 571-272-7349. The examiner can normally be reached on Monday through Thursday from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L. Ometz, can be reached on 571-272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
